Summary

Compiler engineer and reverse engineer with embedded systems background and 7 years of cybersecurity experience. Hands-on experience in binary analysis, reverse engineering and malware analysis. Certified in Sec+, CASP+/SecX, CEH, PMAT, IMBT and others. Looking to apply my expertise as a security engineer, reverse engineer or malware analyst.

Work experience

Compiler Engineer | Reverse Engineer @ *HighTec EDV-Systeme GmbH - Budapest, Hungary* **Feb 2023 – Present**

- Obfuscating the HighTec Rust toolchain binaries against reverse engineering
- Representing HighTec as a member of the LLVM security group
- Implementing custom LLVM-based obfuscator pass plugins

Application Security Engineer @ *Knorr-Bremse - Budapest, Hungary* **May 2018 – Jan 2023**

- Developed and maintained iOS and Android apps for real-time vehicle data visualization
- Implemented and evaluated static application security testing across embedded C codebases
- Resolved embedded systems vulnerabilities discovered through AFL++ fuzzing

Technical skills

Programming languages: C, C++, Rust, Objective-C, Swift, Python 3, Java, Assembly (ARM64, x86-64), Bash

Reverse engineering (static): Ghidra, IDA, otool, llvm-objdump, ipsw, Apktool, jadx, Binwalk, capa, YARA, DiE

Reverse engineering (dynamic): LLDB, GDB, Frida, DTrace, ADB, eBPF, strace, QEMU, Qiling, VirtualBox, x64dbg

Vulnerability research: checksec, ROPgadget, AFL++, ASan, MSan, TSan, UBSan

Network analysis and protocols: Wireshark, Suricata, Zeek, FakeNet-NG, INetSim, TCP, UDP, HTTP, HTTPS, DNS

Platforms and DevOps tools: Linux (Fedora, Ubuntu), macOS, Windows, Git, Docker, GitHub Actions, Jenkins

Embedded systems and protocols: STM32, ESP32, Wi-Fi, CAN, SPI, UART, I2C

Certifications

CompTIA Security+, CompTIA CASP+/SecurityX, EC-Council CEH, TCM Security PMAT, Invoke RE IMBT and others.

Open source contributions

- ghidra: contributing bug reports and patches to Ghidra, focusing on the BSim, Debugger and FunctionID features
- phantom-pass: implementing custom LLVM-based obfuscator pass plugins
- o-mvll: improving the LLVM-based iOS code obfuscator passes and diagnostics
- rust-arm64: writing a Rust book (*Rust to assembly: ARM64 patterns*)
- shadow-shell: developing a cyber lab for shellcode analysis, using Assembly and C

Education

MSc in Mechatronics Engineering **Feb 2016 – June 2018**

Budapest University of Technology and Economics - Budapest, Hungary

BSc in Mechatronics Engineering **Sept 2012 – Jan 2016**

University of Pannonia - Veszprém, Hungary

Continuous education

Currently I am actively learning on TryHackMe and reading Advanced Apple Debugging & Reverse Engineering.
